Forecast RMSE relative to the DGP forecast

Qualified estimates | each ratio uses common usable replications | 1 = equal RMSE

ECH oracle, ECH selected, CML, IHR, HR1, NET, RBY, DPF, MLE, VAR (BIC)

log10(ratio)

0.00 0.02 0.04 0.06

Numbers are RMSE ratios, not averages of replication-wise ratios. Colour represents log10(ratio).
Missing outputs remain in failure counts. Large finite errors are retained. See CSV tables for paired counts and Monte Carlo standard errors.
