Design 4: response y1 to innovation 1

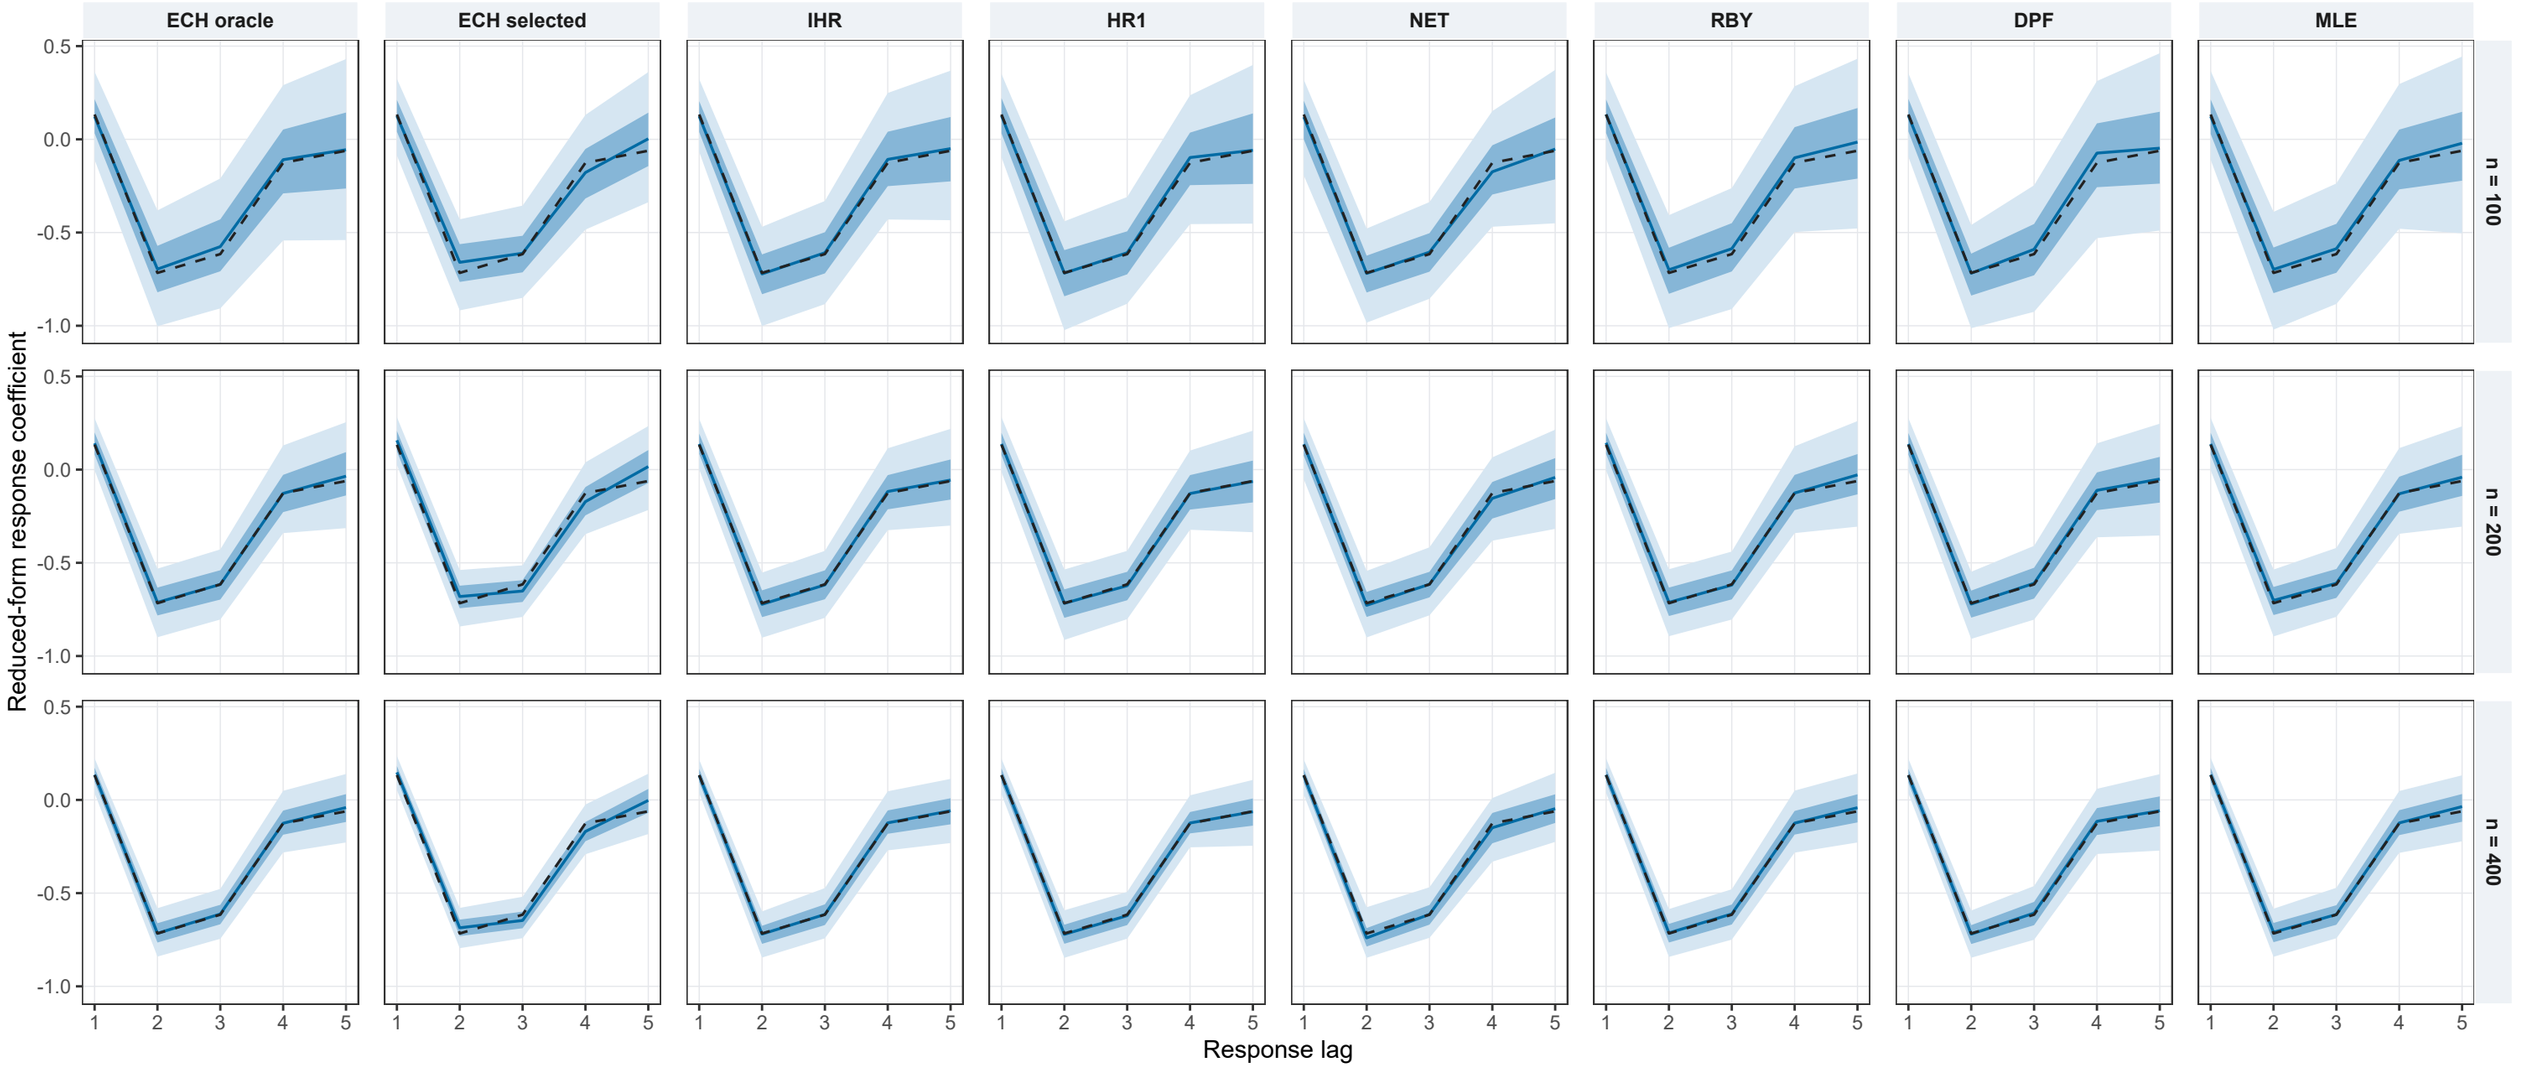

Sampling distribution of IRF estimates | all sample sizes

Blue line: median. Dark band: 25th-75th percentiles. Light band: 5th-95th percentiles. Dashed line: population response.
Bands describe variation across Monte Carlo replications; they are not confidence intervals. Extreme losses remain in the RMSE summaries.

Design 4: response y1 to innovation 2

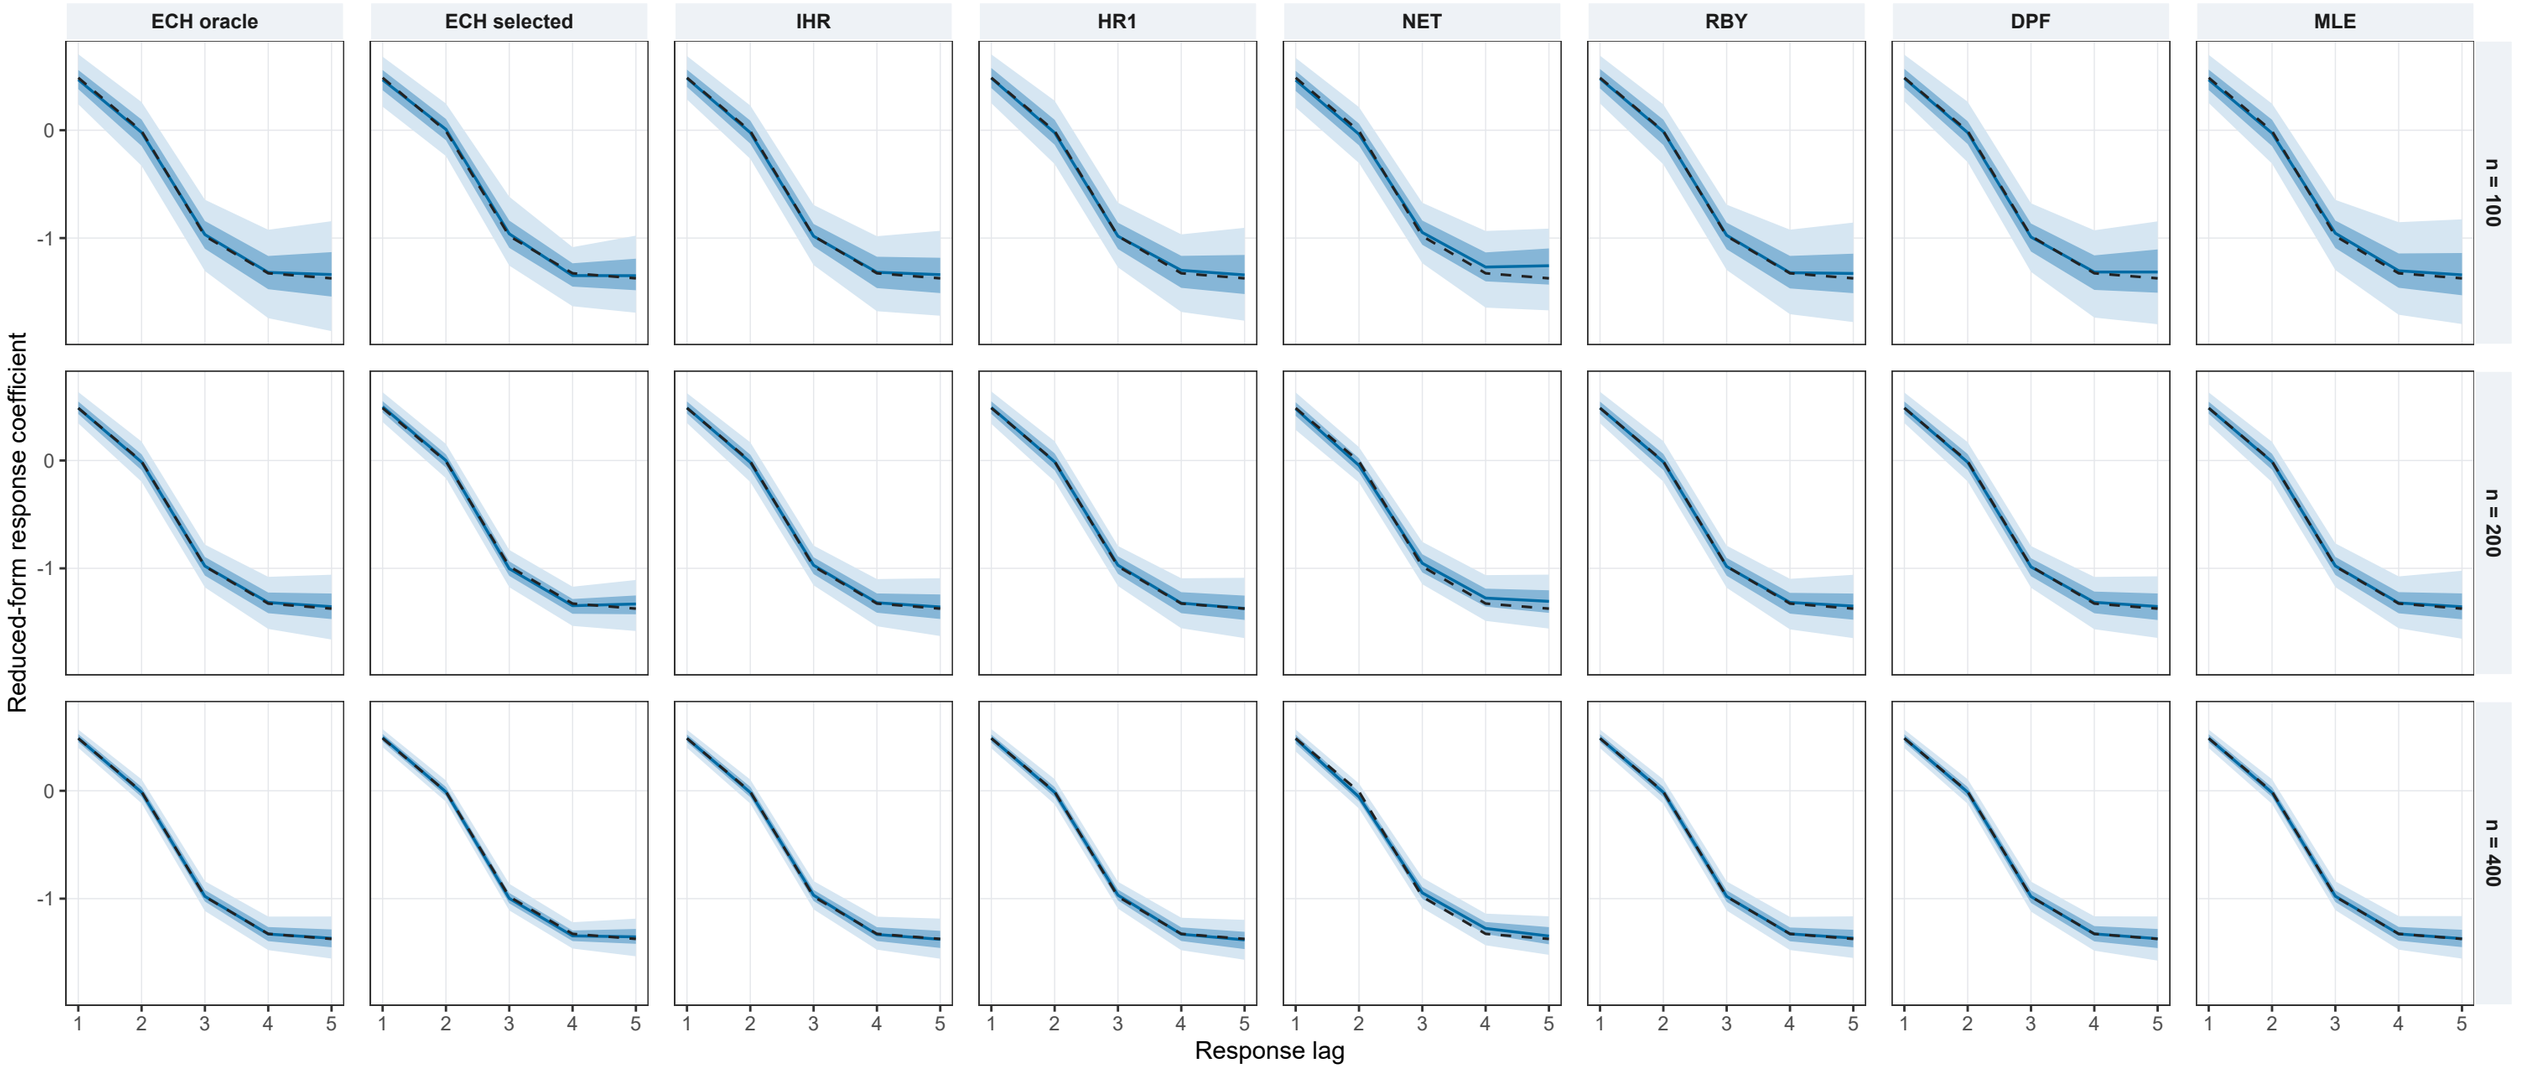

Sampling distribution of IRF estimates | all sample sizes

Blue line: median. Dark band: 25th-75th percentiles. Light band: 5th-95th percentiles. Dashed line: population response.
Bands describe variation across Monte Carlo replications; they are not confidence intervals. Extreme losses remain in the RMSE summaries.

Design 4: response y1 to innovation 3

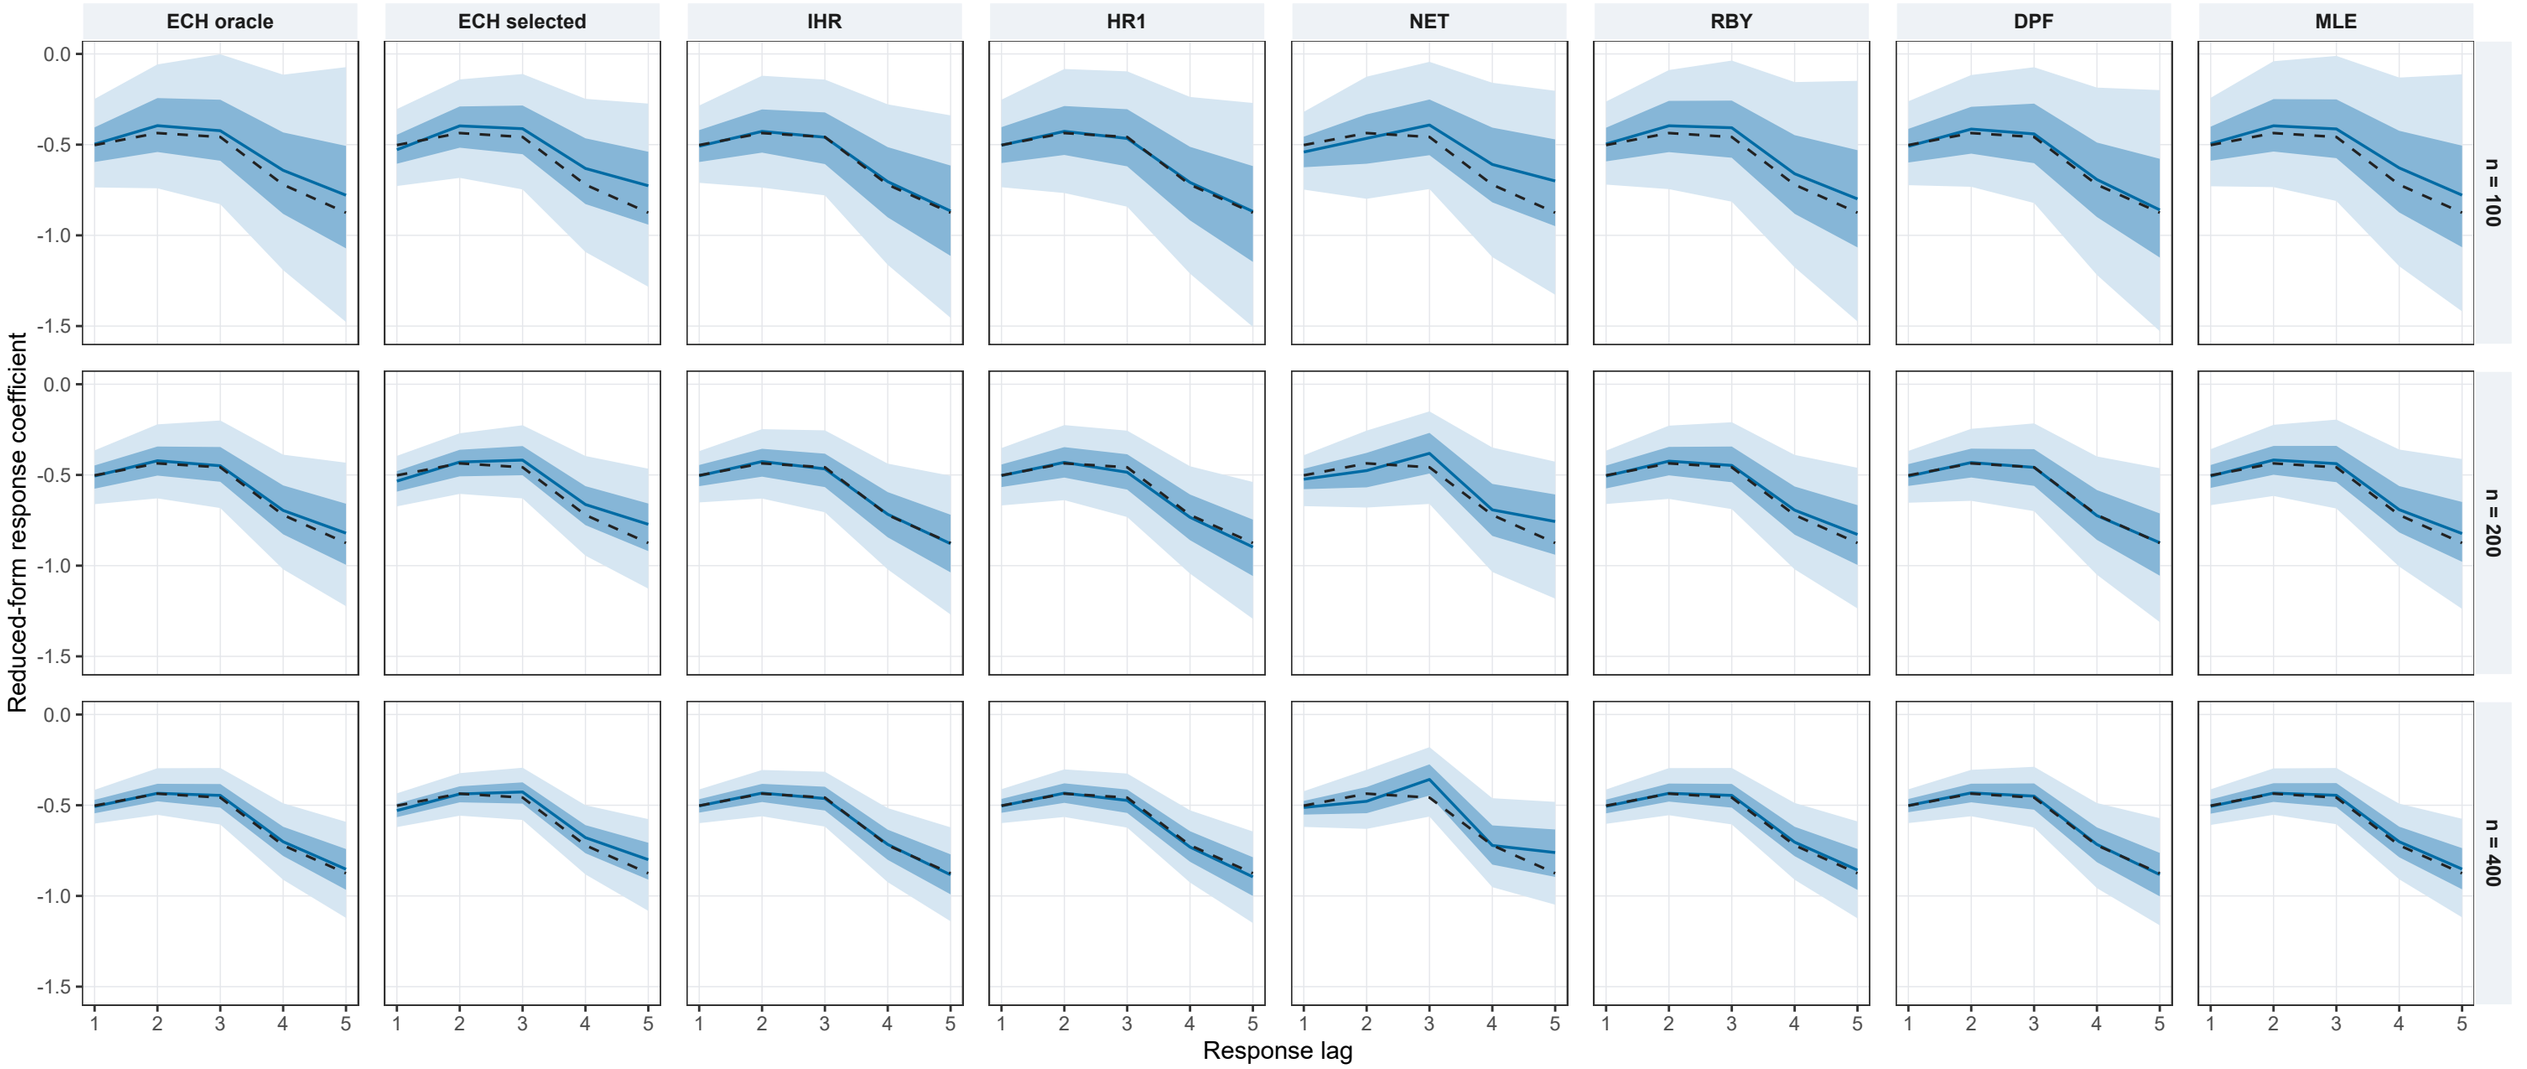

Sampling distribution of IRF estimates | all sample sizes

Blue line: median. Dark band: 25th-75th percentiles. Light band: 5th-95th percentiles. Dashed line: population response.
Bands describe variation across Monte Carlo replications; they are not confidence intervals. Extreme losses remain in the RMSE summaries.

Design 4: response y2 to innovation 1

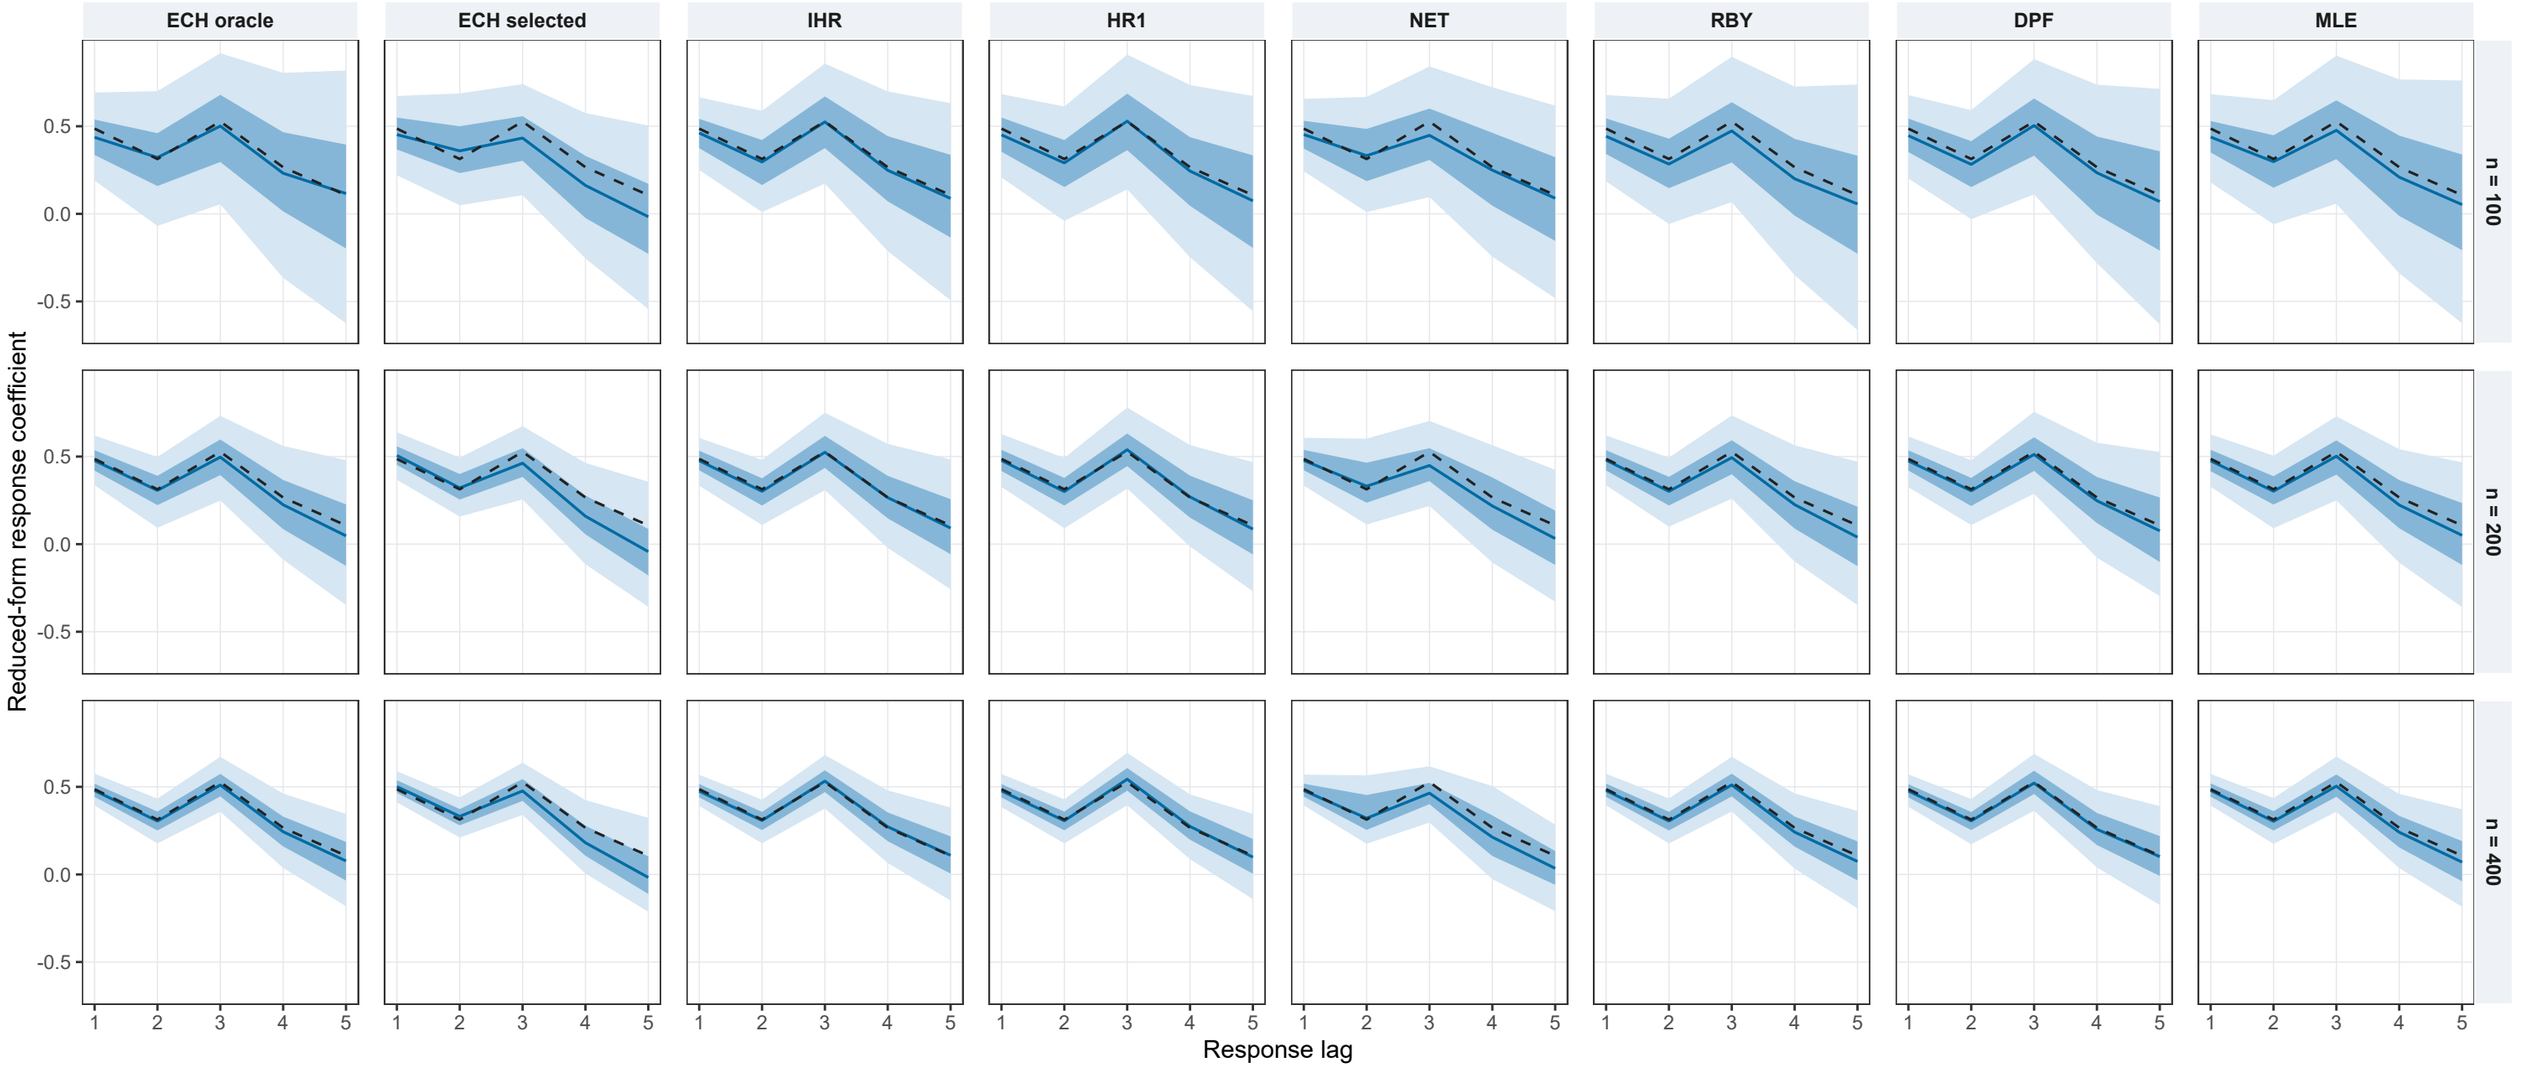

Sampling distribution of IRF estimates | all sample sizes

Blue line: median. Dark band: 25th-75th percentiles. Light band: 5th-95th percentiles. Dashed line: population response.
Bands describe variation across Monte Carlo replications; they are not confidence intervals. Extreme losses remain in the RMSE summaries.

Design 4: response y2 to innovation 2

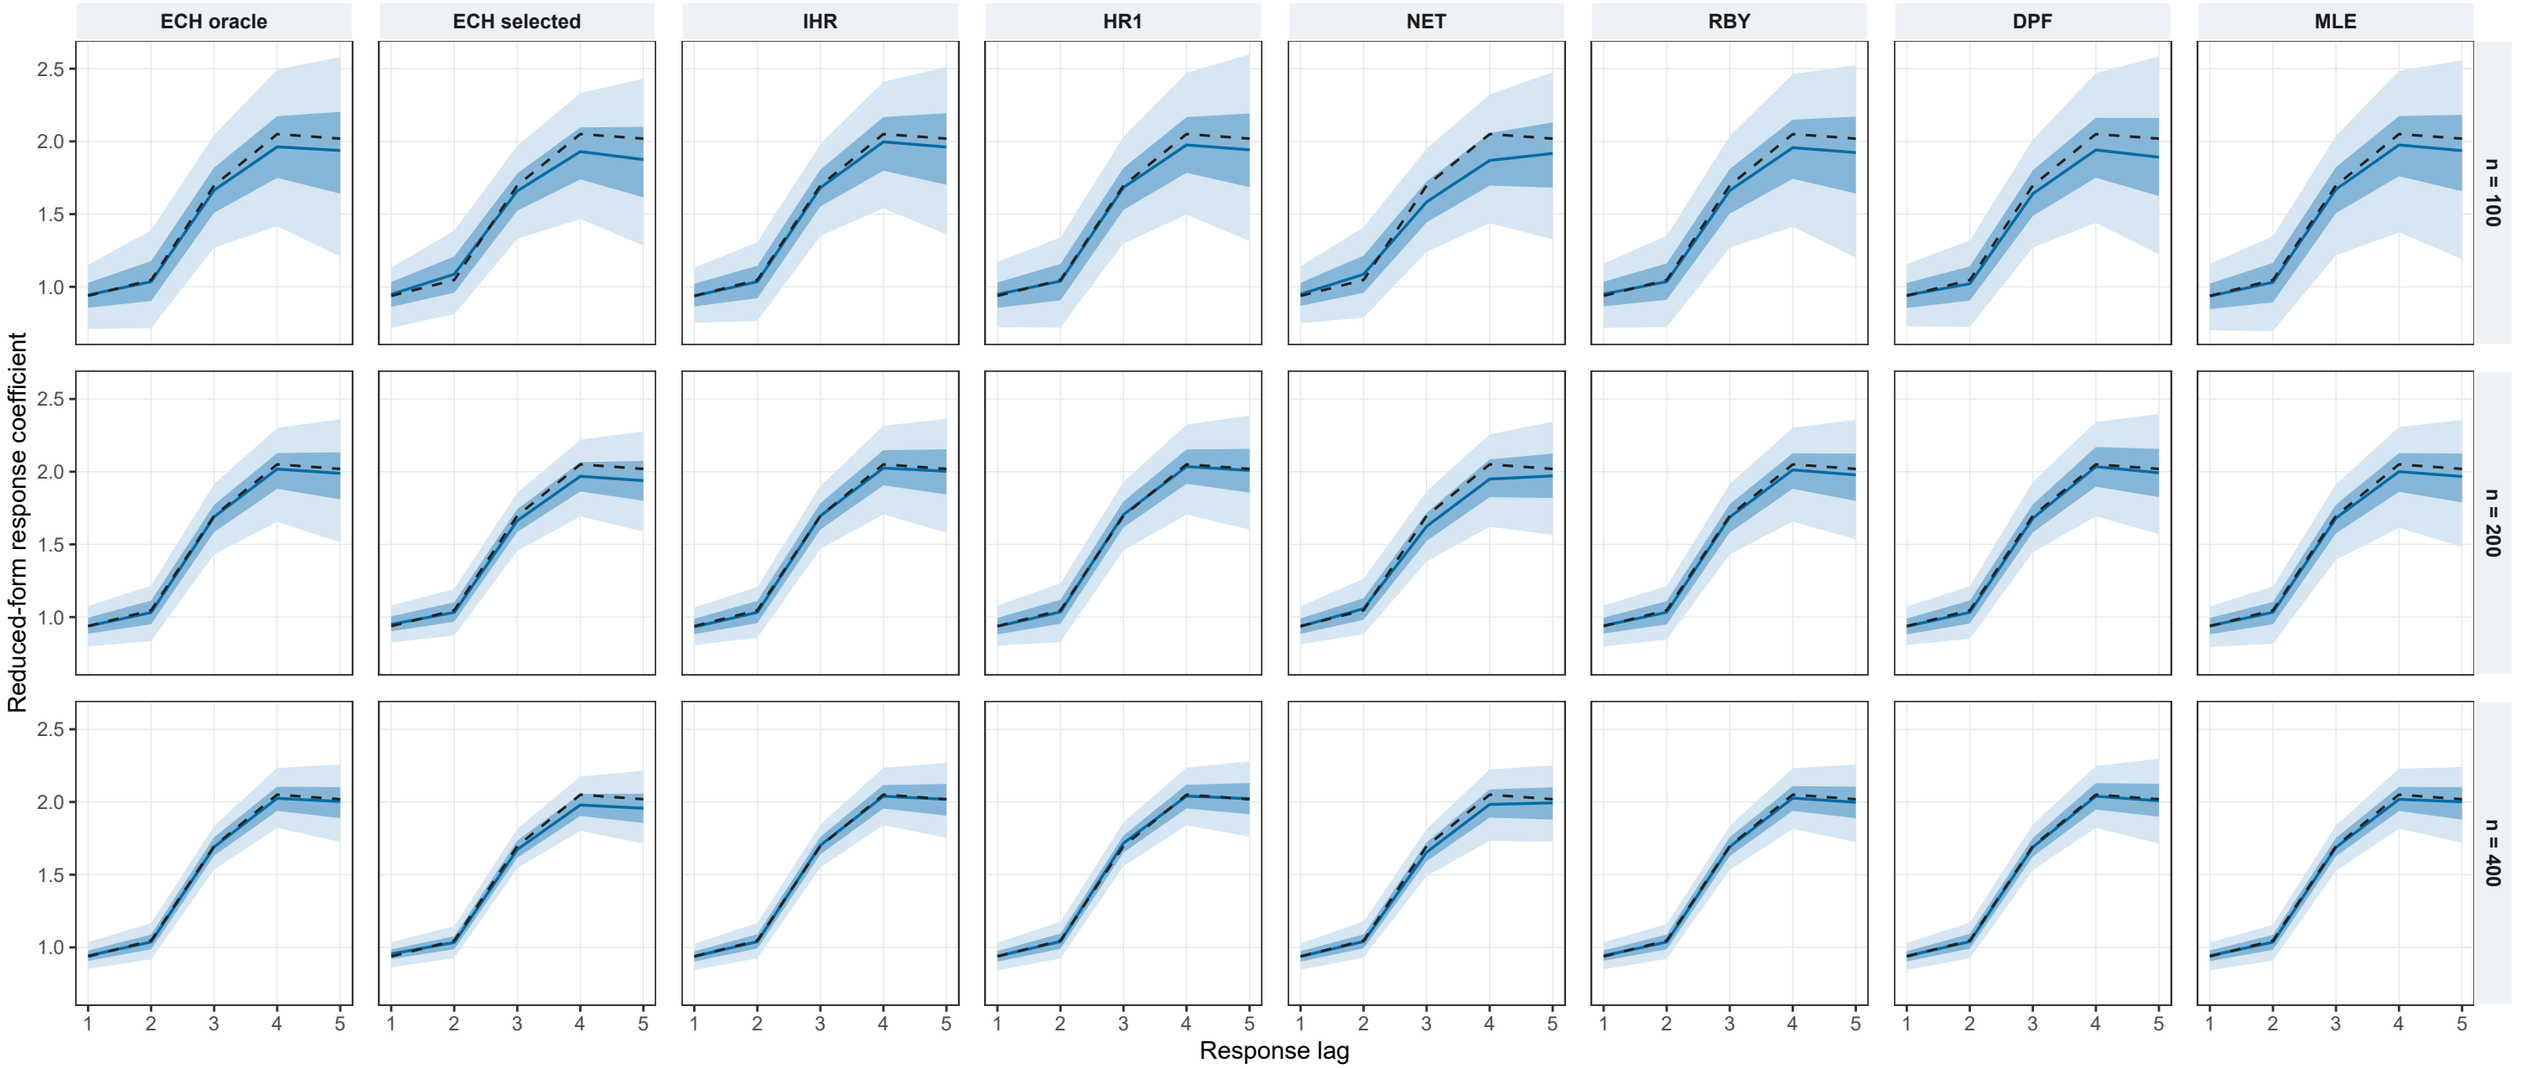

Sampling distribution of IRF estimates | all sample sizes

Blue line: median. Dark band: 25th-75th percentiles. Light band: 5th-95th percentiles. Dashed line: population response.
Bands describe variation across Monte Carlo replications; they are not confidence intervals. Extreme losses remain in the RMSE summaries.

Design 4: response y2 to innovation 3

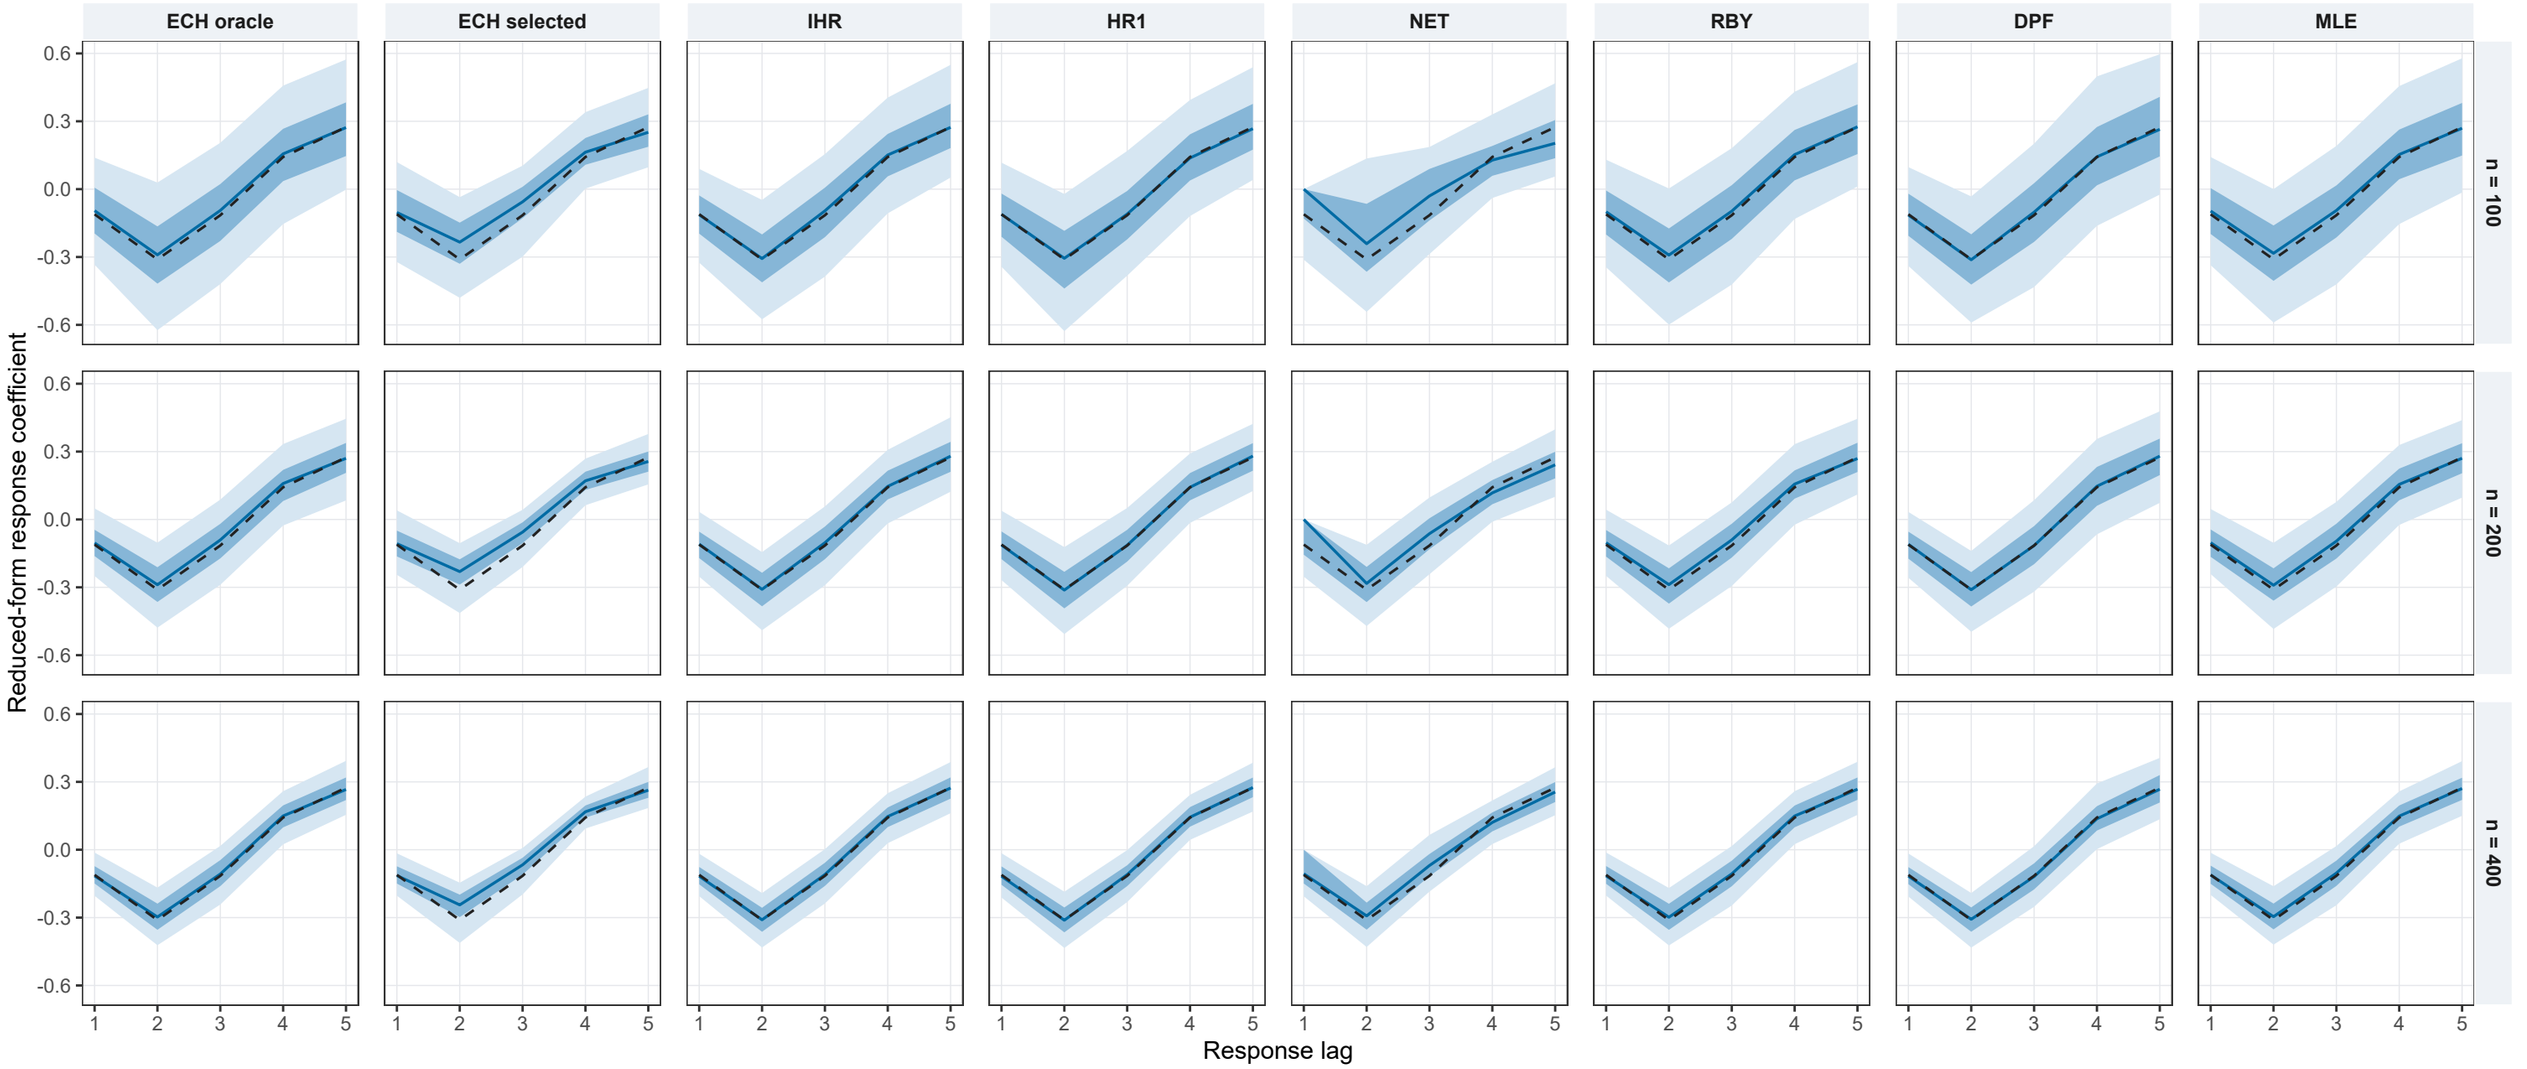

Sampling distribution of IRF estimates | all sample sizes

Blue line: median. Dark band: 25th-75th percentiles. Light band: 5th-95th percentiles. Dashed line: population response.
Bands describe variation across Monte Carlo replications; they are not confidence intervals. Extreme losses remain in the RMSE summaries.

Design 4: response y3 to innovation 1

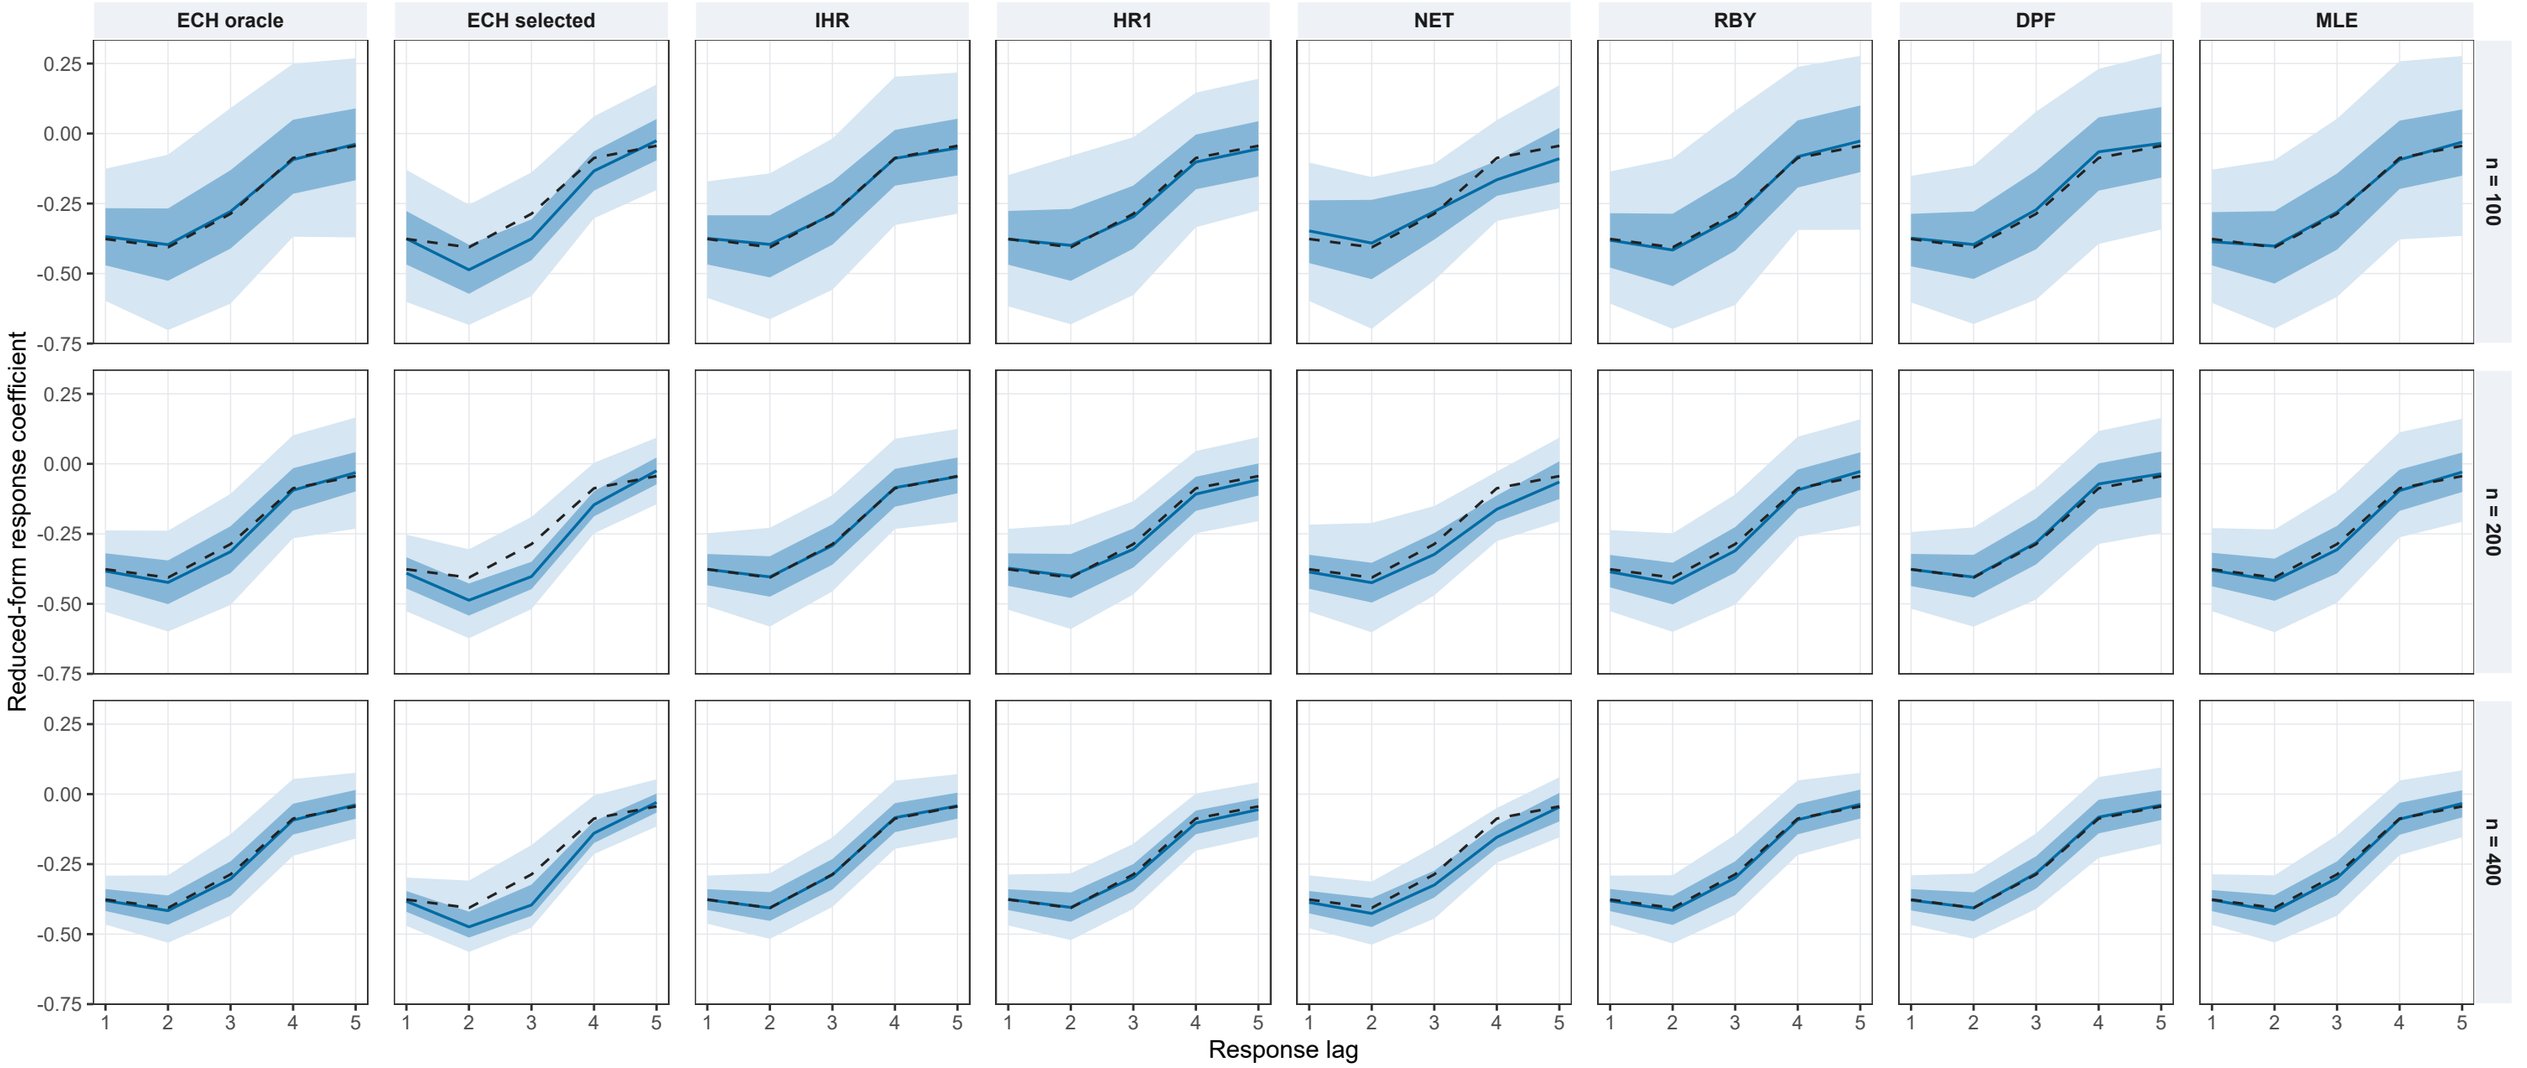

Sampling distribution of IRF estimates | all sample sizes

Blue line: median. Dark band: 25th-75th percentiles. Light band: 5th-95th percentiles. Dashed line: population response.
Bands describe variation across Monte Carlo replications; they are not confidence intervals. Extreme losses remain in the RMSE summaries.

Design 4: response y3 to innovation 2

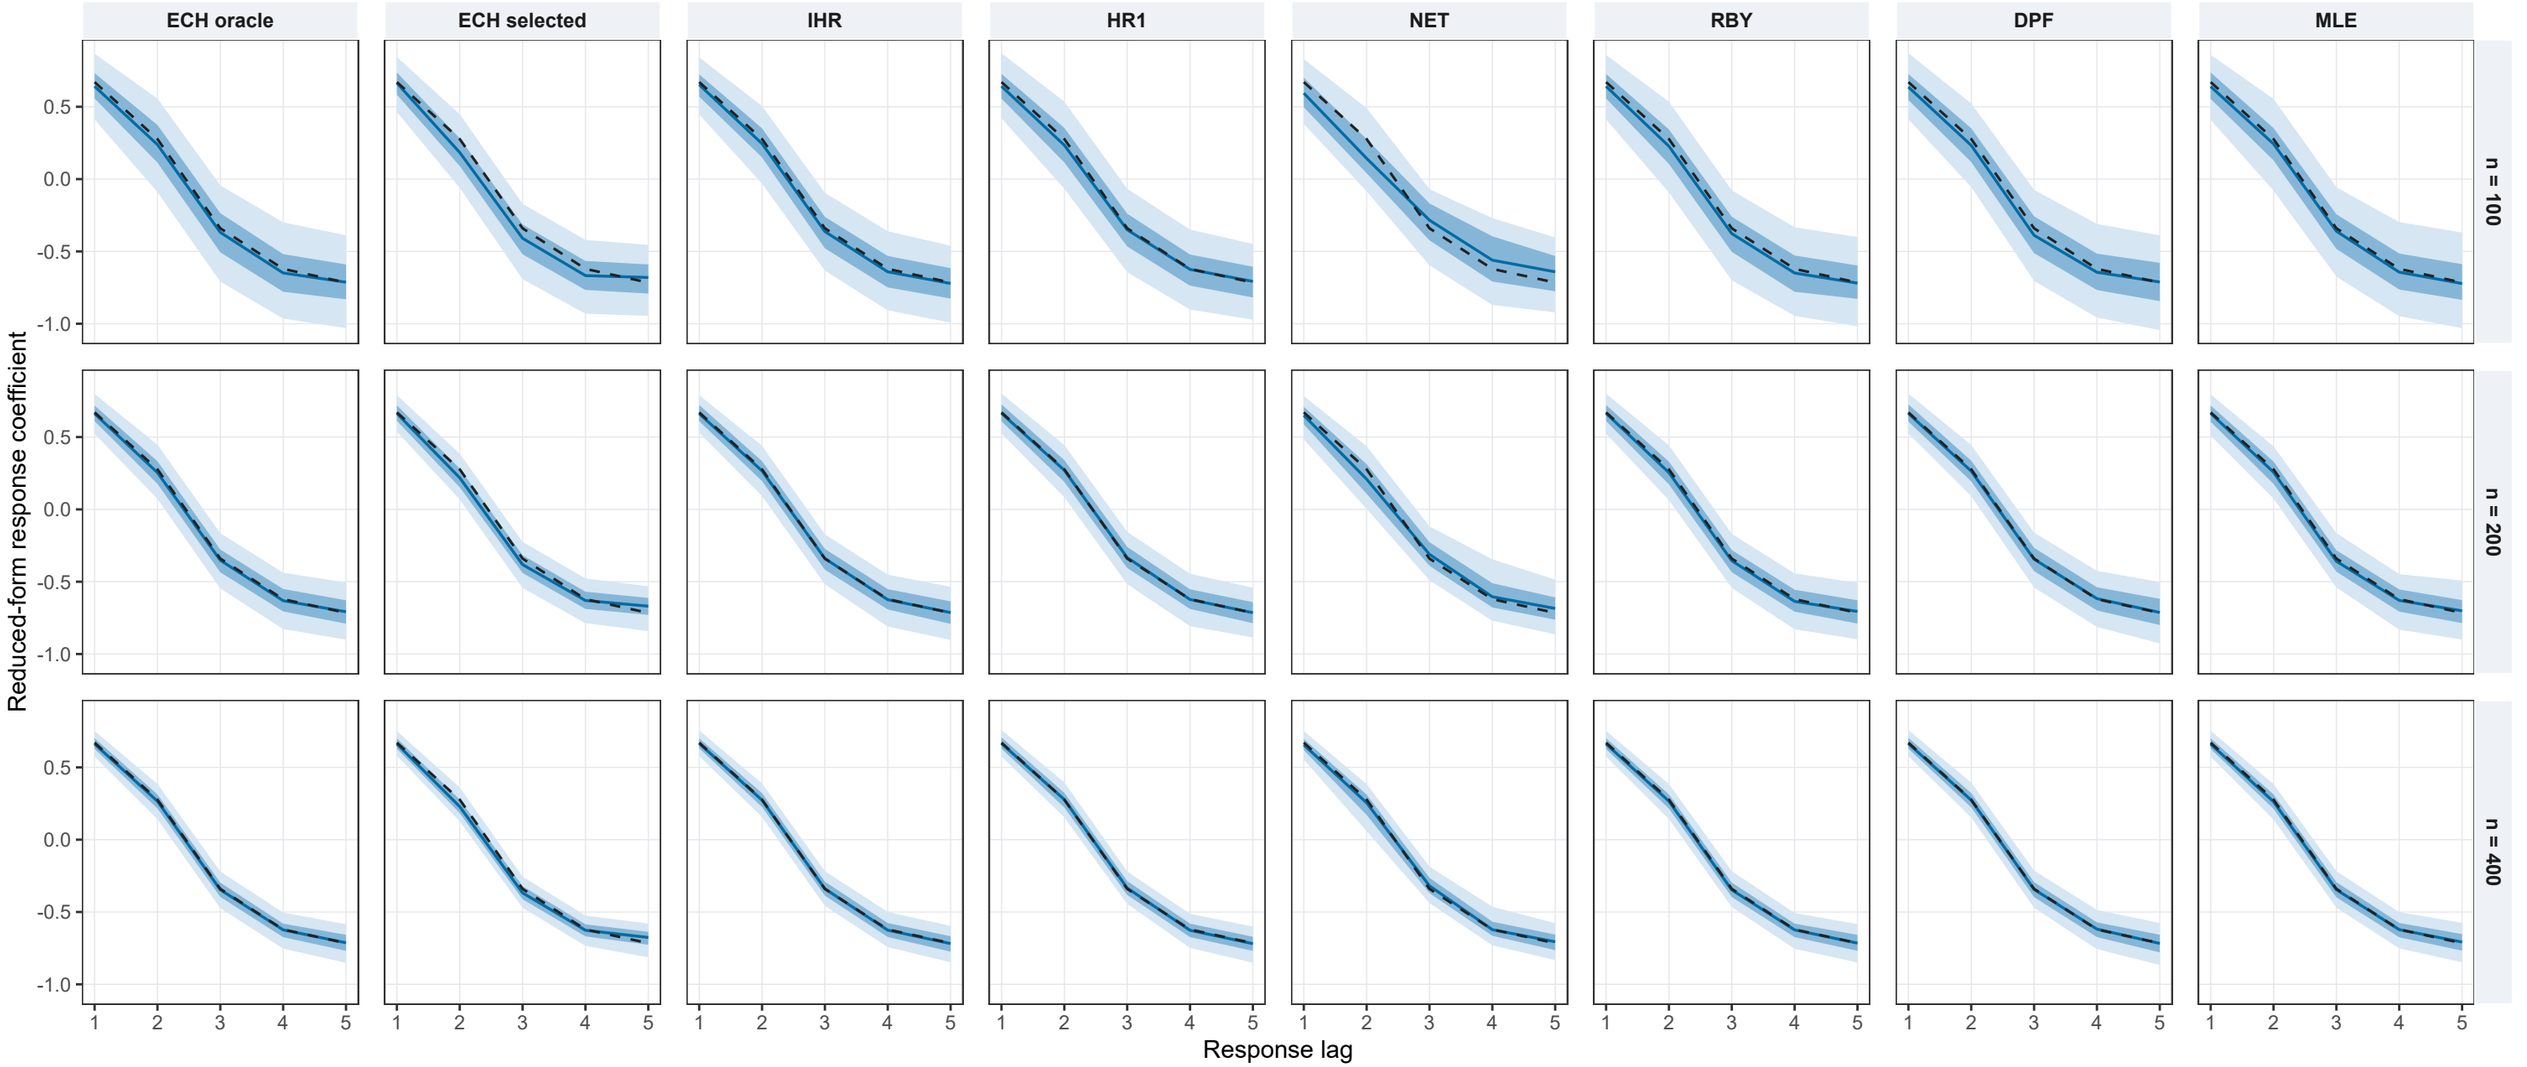

Sampling distribution of IRF estimates | all sample sizes

Blue line: median. Dark band: 25th-75th percentiles. Light band: 5th-95th percentiles. Dashed line: population response.
Bands describe variation across Monte Carlo replications; they are not confidence intervals. Extreme losses remain in the RMSE summaries.

Design 4: response y3 to innovation 3

Sampling distribution of IRF estimates | all sample sizes

Blue line: median. Dark band: 25th-75th percentiles. Light band: 5th-95th percentiles. Dashed line: population response.
Bands describe variation across Monte Carlo replications; they are not confidence intervals. Extreme losses remain in the RMSE summaries.
